

Paris, June 6th, 2018

PRESS RELEASE

“10 Grenelle” – ERAMET’s new head office

On Monday June 4th, the ERAMET group moved into its new head office at 10, Boulevard de Grenelle in the 15th district of Paris.

ERAMET, which had been in Tour Montparnasse since the tower was built in 1973, opted for a new location in line with NeWays, the management transformation project launched in autumn 2017. NeWays is designed to transform the way ERAMET operates, along three main lines: new ways of organising, with lighter, more responsive structures; new ways of managing, through dynamic talent development and manager empowerment; and new, more open and agile ways of working with a focus on innovation, performance and results.

All 400 head office employees moved into modern workspaces that favour connectedness, transparency and mobility, as well as breaking down barriers.

The 10 Grenelle building was extensively restructured by Braun + Associés, under the supervision of the owner, AG2R la Mondiale. It meets the highest current environmental standards. The building is certified outstanding HQE (French label for new tertiary buildings), LEED Gold and BREEAM outstanding, and has the BBC Rénovation Effinergie label for energy efficiency.

The building is located on the site of the former winter velodrome, where the Vel' d'Hiv Roundup took place in 1942. During the renovation, a memorial was built to host commemorative gatherings and contribute to the duty of remembrance.

The Group’s Chairman & CEO Christel BORIES stated, *“We’re delighted to be at this new location with its modern, open workspaces, reflecting our will to transform ERAMET in depth. We remain in central Paris, close to the main transport routes that an international group like ours needs. We’re giving our employees better working conditions, new digital tools and a more user-friendly platform to organise ourselves and work together. It’s a milestone for all of us.”*

The new address for ERAMET and all subsidiaries based at the head office is **10 boulevard de Grenelle, CS 63205 – 75015 Paris - France.**

ABOUT ERAMET

ERAMET is one of the world's leading producers of:

- manganese and nickel, used to improve the properties of steels, and mineral sands (titanium dioxide and zircon),
- parts and semi-finished products in alloys and high-performance special steels, used by industries such as aerospace, power generation, and tooling.

ERAMET is also developing activities with strong growth potential, such as lithium extraction and recycling.

The Group employs around 12,600 people in 20 countries.
