

Paris, July 1st, 2026, 6:00pm

PRESS RELEASE

Appointment of Julien Burdeau to lead the Eramet's Group Research and Innovation Centre

Julien Burdeau has been appointed President of Eramet Ideas, effective July 1st, 2026. In this role, he will be responsible for ensuring the alignment of the innovation strategy with the Group's strategic priorities.

A graduate of the École normale supérieure and the Corps des Mines, and holder of a PhD in Applied Mathematics, Julien Burdeau has built extensive experience across a range of environments, including the French Ministry of Industry, as well as the stainless-steel industry (Aperam), the LNG sector (Gaztransport & Technigaz), and the high-performance alloys industry (Aubert & Duval).

In his previous position as Director of Decarbonization, Julien Burdeau has played a key role in defining and deploying the Group's decarbonization strategy, working closely with the business units to reconcile climate ambition, industrial performance and long-term competitiveness.

Geoff Streeton, Chief Development Officer, in charge of Strategy, Innovation and Business Development, Member of Eramet's Executive Committee:

« The challenges facing our industry require us to accelerate the transformation of scientific advances into industrial solutions. Thanks to his experience, strategic vision and deep understanding of our businesses, Julien has all the qualities needed to accelerate this momentum and further strengthen Eramet Ideas' contribution to the Group's competitiveness. »

Eramet Ideas is the Group's innovation center. It brings together scientific expertise, research activities and technology development to accelerate the design and deployment of innovative solutions supporting Eramet's businesses. Its teams work closely with operational sites to transform scientific excellence into industrial innovation. Among its flagship achievements is the Group's proprietary Direct Lithium Extraction (DLE) technology, now deployed at industrial scale in Argentina and central to Eramet's ambition to become a leading player in the sustainable production of lithium.

ABOUT ERAMET

Eramet transforms the Earth's mineral resources to provide sustainable and responsible solutions to the growth of the industry and to the challenges of the energy transition.

Its employees are committed to this through their civic and contributory approach in all the countries where the mining and metallurgical group is present.

Manganese, nickel, mineral sands, lithium, and cobalt: Eramet recovers and develops metals that are essential to the construction of a more sustainable world.

As a privileged partner of its industrial clients, the Group contributes to making robust and resistant infrastructures and constructions, more efficient means of mobility, safer health tools and more efficient telecommunications devices.

Fully committed to the era of metals, Eramet's ambition is to become a reference for the responsible transformation of the Earth's mineral resources for living well together.
